

ENTIRELY
ITALIAN
PRODUCED.

Technology on moving.

Combining functionality and flexibility, allows an easy work and freedom of movement. With its intuitive control panel on a Glass surface, designed for a quick and perfect disinfection, ensuring high performance and maximum hygiene. Miglionico Cart stand Alone version has its water supply system and its own foot control. Miglionico Cart could be also connected to the Unit.

The tray holder, removable and autoclavabile, is available in three sizes. Practical to be moved on a sliding guide and to be positioned on the short side, the tray holder is equipped with a white silicone mat. The largest size is designed to accommodate 2 standard trays.

The multifunction control panel is with capacitive touch technology on a Glass surface completely encapsulated in a rotatable painted polyurethane structure to offer better work ergonomics.

The console is designed to accommodate up to 6 instruments. Automatic instruments activation by optical sensors. All the supports are removable and autoclavable.

The independent water supply system by the in built bottle, is fitted as a standard feature.

The multifunction foot control is ergonomic, solid and well balanced on the floor thanks to its base in steel (about 5kg) that ensures maximum stability during the work flow, avoiding to slip or accidental movements.

The handles are removable and autoclavable, have an ergonomic, anti-slip shape and can be mounted in two different ways.

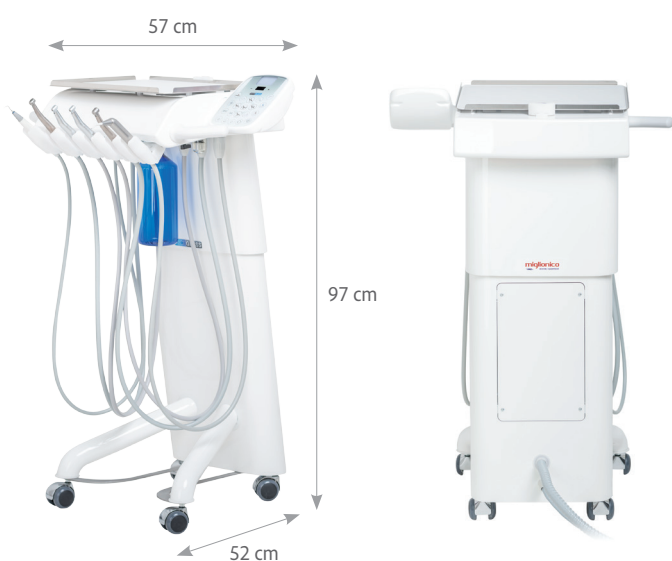

Versatility

The Cart can be connected to the SYNCRO chair in the NICE GLASS PCard version or combined with the HYDRO UNIT ON WHEELS
