COMPANY PROFILE

Medibrex is a leading producer and worldwide distributor of multiple revolutionized medical, dental, para-pharmaceutical and cosmetic products. Medibrex aims to deliver to the healthcare community products that enhance the quality of life and provide functional and financial value. Medibrex's parent company, Librex Holding, Inc., founded in 1987, develops and markets purification products in more than 55 countries around the world.

Over the last 8 years, Medibrex has expanded into new territories, from the GCC and MENA region all the way to Europe and China and has enriched its portfolio with a range of products that advance the world of health with improved efficiency and cost. At Medibrex we pride ourselves in tailoring our services to the needs of our valuable customers by providing them with consistent precision instruments, targeted tools and exclusive components.

05 | COMPAMY PROFILE

Plastivy is Medibrex's latest launched product. It offers a wide range of plastic solutions that help the user improve the diagnostics and delivery of care. Plastivy products meet the international requirements of each one of the working fields (pharmacy, cosmetology, bio analysis, agronomy, veterinary, microbiology, odontology, genetics, nursing, medicine, among others).

Manufacturing zero-defect products is Medibrex' goal of quality. We have a unique concept for quality control measures throughout each stage from raw material procurement to manufacturing and packing cycle.

Our Manufacturing plant conforms to GMP quality standards. Our Quality Control standards conform to ISO 13485:2016 and European Medical Device Directive 93/42/EEC. Our products have been authorized to label CE mark and US FDA for proven safety. These standards are evident in the physical ambience of our plant, manufacturing technology, packaging and the sterilization process. Special micro and HEPA filters at all air handling units ensure minimal contamination in all manufacturing areas. Microorganism and particle concentration levels are carefully monitored to stay within safe limits. Employees undergo periodic training to maintain adequate qualifications and instructions of hygiene standards. All clean rooms are provided with a change room at the entrance to ensure a dust-free environment.

Plastivy products are packed by the most modern packaging machines, to ensure minimal risk of contamination or damage during transportation. We use Gamma Radiation to sterilize the product, as per ISO 11135/EN 550 standards, each batch is released after strict inspection

Relying on a qualified team, we have strengthened ourselves as a leading company in the laboratory equipment field. Professionals and technicians with a wide experience in the scientific and industrial fields have worked together in the last years to develop ,innovate and investigate new technologies, so that everyone of our clients counts with the highest quality of our durable products.

INTENDED USE

Used to culture cells on solid media for microbiological studies

MATERIAL

Manufactured using polystyrene

FEATURES

- Manufactured either aseptically or ETO sterilized under ISO 7 clean room conditions
- Crystal clear to ensure premium optical quality
- Optimal planarity
- Requires less media than others
- CE marked

Product Code	Diameter (mm)	Sterility	Packing	Number of Vents	Inner Pack Quantity	Pieces per box
IPD-600	60	Aseptic	Standard	3	10	1400
IPD-601	60	Sterile	Standard	3	10	1400
IPD-602	60	Aseptic	Standard	0	10	1400

24 Hour Urine Container

INTENDED USE

Used for the collection of urine over 24 hours

MATERIAL

- 3L: container and cap manufactured using polyethylene
- 2.5L: container manufactured using polyethylene
- Cap manufactured using polyethylene

FEATURES

- Leak-proof design
- The 2.5 Liter contains a small cap opening suitable for Vacurate® holder insertion, and hence easy urine withdrawal without dripping
- CE marked
- SCP-325H with Vacuum Specimen collection insertion

INTENDED USE

Used for the safe disposal of contaminated products and sharps

MATERIAL

Manufactured using polypropylene

FEATURES

- Designed and labelled in accordance to the UN3291 Standard
- Shock-proof container, resistant to solvents and perforation
- Easy to handle
- Permanent and damage-proof closure
- Handles manufactured to withstand the capacity and volume of each container
- Puncture-resistant
- Stable on flat surfaces
- Leak-proof upon locking the lid

Product Code	Total Capacity (L)	Useful Capacity (L)	Maximum Load (kg)	Pieces per box

Blood Collection Tubes 2.5 ML & 5 ML | **Screw Cap**

Conical Tubes 15 ML

Conical Tubes 50 ML

Test Tubes 5 ML

Caps For Test Tubes

Vacurate® Vacuum blood collection | Plain

INTENDED USE

Used in various blood analysis applications and as discard tubes

MATERIAL

- Tubes manufactured using transparent PET
- Caps manufactured using polyethylene
- Additive: none

FEATURES

- Sterile
- Impact resistant and chemically resistant
- Precise and accurate withdrawal of predetermined blood volume through vacuum
- Color coded label and cap, indicating the additive type
- Supplied with plastic tube racks optimized for maximum accommodation and minimum space occupation
- CE marked
- Cap is enclosed with a leak-proof and self-sealing rubber stopper for safe and clean blood transfer

Vacurate® Vacuum blood collection tubes | Clot Activator

INTENDED USE

- Also known as serum tubes
- Used for determinations in serum for clinical routine chemistry

MATERIAL

- Tubes manufactured using transparent PET
- Caps manufactured using polyethylene
- Additive: Clot activator

FEATURES

- Sterile
- Impact resistant and chemically resistant
- Precise and accurate withdrawal of predetermined blood volume through vacuum
- Color coded label and cap, indicating the additive type
- Supplied with plastic tube racks optimized for maximum accommodation and minimum space occupation
- CE marked
- Cap is enclosed with a leak-proof and self-sealing rubber stopper for safe and clean blood transfer

Vacurate® Vacuum blood collection tubes | Lithium Heparin

INTENDED USE

- Also known as plasma tubes
- Used for determinations in plasma for clinical routine chemistry

MATERIAL

- Tubes manufactured using transparent PET
- Caps manufactured using polyethylene
- Additive: Lithium Heparin

FEATURES

- Sterile
- Impact resistant and chemically resistant
- Precise and accurate withdrawal of predetermined blood volume through vacuum
- Color coded label and cap, indicating the additive type
- Supplied with plastic tube racks optimized for maximum accommodation and minimum space occupation
- CE marked
- Caps enclosed with a leak-proof and self-sealing rubber stopper for safe and clean blood transfer

Vacurate® Vacuum blood collection tubes | K₂EDTA

INTENDED USE

Used for determinations in whole blood for hematology

MATERIAL

- Tubes manufactured using transparent PET
- Caps manufactured using polyethylene
- Additive: Sprayed K₂EDTA

FEATURES

- Sterile
- Impact resistant and chemically resistant
- Precise and accurate withdrawal of predetermined blood volume through vacuum
- Color coded label and cap, indicating the additive type
- Supplied with plastic tube racks optimized for maximum accommodation and minimum space occupation
- CE marked
- Cap is enclosed with a leak-proof and self-sealing rubber stopper for safe and clean blood transfer

Vacurate® Vacuum blood collection tubes | Potassium Fluoride + K₃EDTA

INTENDED USE

- Also known as glucis tubes
- Used for glucose determination

MATERIAL

- Tubes manufactured using transparent PET
- Caps manufactured using polyethylene
- Additive: Potassium Fluoride + K₃EDTA

FEATURES

- Sterile
- Impact resistant and chemically resistant
- Precise and accurate withdrawal of predetermined blood volume through vacuum
- Color coded label and cap, indicating the additive type
- Supplied with plastic tube racks optimized for maximum accommodation and minimum space occupation
- CE marked
- Cap is enclosed with a leak-proof and self-sealing rubber stopper for safe and clean blood transfer

Vacurate® Vacuum blood collection tubes

Sodium Citrate 3.2%

INTENDED USE

- Also known as coagulation tubes
- Used for determination in Plasma for coagulation testing

MATERIAL

- Tubes manufactured using transparent PET
- Caps manufactured using polyethylene
- Additive: Sodium Citrate 3.2%

FEATURES

- Sterile
- Impact resistant and chemically resistant
- Precise and accurate withdrawal of predetermined blood volume through vacuum
- Color coded label and cap, indicating the additive type
- Supplied with plastic tube racks optimized for maximum accommodation and minimum space occupation
- CE marked
- Cap is enclosed with a leak-proof and self-sealing rubber stopper for safe and clean blood transfer

Vacurate® Vacuum blood collection tubes

Sodium Citrate 3.8%

INTENDED USE

- Also known as coagulation tubes
- Used in various blood analysis applications

MATERIAL

- Tubes manufactured using transparent PET
- Caps manufactured using polyethylene
- Additive: Sodium Citrate 3.8%

FEATURES

- Sterile
- Precision molded
- Impact resistant and chemically resistant
- Precise and accurate withdrawal of predetermined blood volume through vacuum
- Color coded label and cap, indicating the additive type
- Supplied with plastic tube racks optimized for maximum accommodation and minimum space occupation
- CE marked
- Cap is enclosed with a leak-proof and self-sealing rubber stopper for safe and clean blood transfer

Vacurate® Vacuum blood collection tubes

INTENDED USE

- A closed system for a clean urine draw without coming into contact with the specimen
- Used in urinalysis

MATERIAL

- Tubes manufactured using transparent PET
- Caps manufactured using polyethylene
- Additive: no preservative

FEATURES

- Sterile
- CE marked
- Impact resistant and chemically resistant
- Precise and accurate withdrawal of predetermined blood volume through vacuum
- Color coded label and cap
- Cap is enclosed with a leak-proof and self-sealing rubber stopper for safe and clean urine transfer
- Supplied with plastic tube racks optimized for maximum accommodation and minimum space occupation

Tourniquets

INTENDED USE

- Used for the constriction and control of blood circulation

MATERIAL

- Manufactured with a plastic buckle and an elastic band

FEATURES

- Ergonomic
- Easy to use

Product Code	Pieces per box
IVBCTQ-100	300

Vacuum tube holders

INTENDED USE

Used to hold and accomodated the needle

MATERIAL

Manufactured using polypropylene

FEATURES

- Simple design with a grip for proper handling during blood transfer

Product Code	Pieces per bag	Quantity per box
IVBCH-100	250	2000

Vacuum tube needles

INTENDED USE

- Used to penetrate the vein and help in blood transfer

MATERIAL

- Manufactured using the latest technology in needle manufacturing

FEATURES

- Easy and simple to use with vacuum tube
- Sterile

ICTS-500	Screw Cap, Individually wrapped	Red	Sterile	No	1	500
ICTS-502	Screw Cap	Red	Sterile	No	25	500
ICTS-510	Screw Cap	Red	Sterile	No	100	500
ICTS-506	Screw Cap	Red	Sterile	Yes	25	500

Conical tubes 50mL

INTENDED USE

- Used in centrifugation, sample storage, and molecular biology

MATERIAL

- Tube manufactured using Polypropylene
- Cap manufactured using high density Polyethylene

FEATURES

- Leak-proof
- Conical bottom suitable for centrifugation tests
- Silk screen printing
- Accurate and easy to read graduations
- Superior clarity
- Centrifugation can reach up to 11000 g
- CE marked

Product Code	Description	Cap color	Sterility	Supplied on a rack	Inner pack quantity	Pieces per box
ICTS-600	Screw Cap, Individually wrapped	Red	Sterile	No	1	500

ICTS-606	Screw Cap	Red	Sterile	Yes	25	500

Test tubes 5mL | 12x75

INTENDED USE

Used in dilutions, bacterial cultures, sample storage, centrifugation and precipitates, chromatography fraction collection and other applications

MATERIAL

- Tube manufactured using Polypropylene
- Cap manufactured using low density Polyethylene

FEATURES

- Precision molded
- Total transparency to ensure premium optical quality
- CE marked

Micropipette Tips	100-1000 μL
Micropipette Tips in Rack	5-200 μL
Micropipette Tips in Rack	100-1000 μL
Inoculating Loops	1 μL
Inoculating Loops	10 μL

05 | TIPS AND LOOPS

Micropipette tips | 5-200 µL

INTENDED USE

Used for the transport and sampling of a measured volume of liquid

MATERIAL

Manufactured using polypropylene

FEATURES

- Precision molded tips
- DNase RNase free
- Packaged in sealed economical bulk bags or available in racks
- CE marked
- Standard color is yellow for easy identification. Other colors may be produced upon request

Product Code	Volume Range (µL)	Color	Inner pack quantity	Pieces per box
IMT-102	5-200	Yellow	1000	30000

Micropipette tips | 100-1000 µL

INTENDED USE

Used for the transport and sampling of a measured volume of liquid

MATERIAL

Manufactured using polypropylene

FEATURES

- Precision molded tips
- DNase RNase free
- Packaged in sealed economical bulk bags or available in racks
- CE marked
- Standard color is blue for easy identification. Other colors may be produced upon request

Product Code	Volume Range (µL)	Color	Inner pack quantity	Pieces per box
IMT-101	100-1000	Blue	1000	16000

05 | TIPS AND LOOPS

Micropipette tips in rack | 5-200 μL

INTENDED USE

Used for the transport and sampling of a measured volume of liquid

MATERIAL

- Tips manufactured using polypropylene
- Racks manufactured using polypropylene

FEATURES

- Precision molded tips
- ETO Sterilized
- Packaged in sealed economical bulk bags or available in racks
- Tips are DNase RNase free
- Standard color is yellow for easy identification. Other colors may be produced upon request
- CE marked

Product Code	Volume Range (μL)	Color	Pieces per rack	Racks per box
IMT-102	5-200	Yellow	96	50

Micropipette tips in rack | 100-1000 μL

INTENDED USE

Used for the transport and sampling of a measured volume of liquid

MATERIAL

- Tips manufactured using polypropylene
- Racks manufactured using polypropylene

FEATURES

- Precision molded tips
- ETO Sterilized
- Packaged in sealed economical bulk bags or available in racks
- Tips are DNase RNase free
- Standard color is yellow for easy identification. Other colors may be produced upon request
- CE marked

Product Code	Volume Range (μL)	Color	Pieces per rack	Racks per box
IMT-201	100-1000	Blue	96	30

05 | TIPS AND LOOPS

Inoculating loops | 1 μL

INTENDED USE

Used for the transfer of micro-organisms to growth media/staining slides

MATERIAL

Manufactured using polypropylene

FEATURES

- Made for single use
- Safer to use than metal loops due to the absence of the need for flaming
- CE marked
- Acid-resistant
- Calibrated
- DNase RNase free
- Standard color is yellow for easy identification. Other colors may be produced upon request

Product Code	Capacity (μL)	Color	Sterility	Inner pack quantity	Pieces per box
IIL-011	1	Yellow	ETO	1	1250
IIL-012	1	Yellow	ETO	5	5000
IIL-013	1	Yellow	ETO	10	5000
IIL-014	1	Yellow	ETO	20	5000

Inoculating loops | 10 μL

INTENDED USE

Used for the transfer of micro-organisms to growth media/staining slides

MATERIAL

Manufactured using polypropylene

FEATURES

- Made for single use
- Safer to use than metal loops due to the absence of the need for flaming
- CE marked
- Acid-resistant
- Calibrated
- DNase RNase free
- Standard color is blue for easy identification. Other colors may be produced upon request

Umbilical Cord Clamps
Paper Rolls
Tongue Depressors
Cervix Spatulas
Male Urinals
Female Urinals

05 | VARIOUS MEDICAL SUPPLIES

Medicine cups

INTENDED USE

Used for oral medicine administration

MATERIAL

Manufactured using polypropylene

FEATURES

- Graduated with 30mL capacity
- Pliable and unbreakable
- CE marked

Product Code	Description	Inner pack quantity	Pieces per box
IIL-100	Without lid	100	5000
IIL-101	Lid for Medicine Cup	100	1000
IIL-102	Lid for Medicine Cup	100	2500

Kidney Dishes

INTENDED USE

Used in medical and surgical wards to accommodate soiled dressings and other medical waste

MATERIAL

Manufactured using polypropylene

FEATURES

- Graduated
- Autoclavable
- CE marked

Product Code	Description	Inner pack quantity	Pieces per box
IKD-100	500mL graduated	50	250

05 | VARIOUS MEDICAL SUPPLIES

Burette

INTENDED USE

Used for dispensing precise amounts of a liquid reagent

FEATURES

- Clear and accurate graduation
- ETO sterilized, non-toxic, non-pyrogenic
- Individually packed

Product Code	Inner pack quantity	Pieces per box
IBS-150	25	100

Blood Exchange Set

INTENDED USE

- Used for the removal of high concentrations of toxins in the blood which are not otherwise removable by diuresis, dialysis or chelation.
- Non-pyrogenic, non-toxic, and latex-free
- ETO sterilized

MATERIAL

- One blood transfusion set
- One extension tube with a needle and an injection site
- One extension tube
- One collection bag for discarded blood
- One X-ray opaque 5 Fr umbilical catheter
- One X-ray opaque 8 Fr umbilical catheter
- One 10mL luer locking syringe
- Two 20mL luer locking syringes
- One 25g needle
- One 4-way stopcock
- One 15cm ruler
- Three 50x50mm gauze swabs
- One table cover
- One pair of gloves
- One fenestrated drape
- One exchange transfusion record

Product Code	Pieces per box
IBE-100	10

05 | VARIOUS MEDICAL SUPPLIES

Umbilical Cord Clamps

INTENDED USE

Used for clamping the umbilical cord of newly born babies

MATERIAL

Manufactured using acetal copolymer

FEATURES

- ETO Sterilized and individually wrapped
- Tamper-proof security lock to prevent accidental opening after clamping
- CE marked

Product Code	Sterility	Inner pack quantity	Pieces per box
ICC-100	ETO	40	3000

Paper Rolls

INTENDED USE

Used on exam tables in clinical consultations

FEATURES

- High quality paper
- Perforated every 50cm

Product Code	Color	Length (m)	Width (cm)	Pieces per box
IPR-500	White	50	50	16

05 | VARIOUS MEDICAL SUPPLIES

Tongue Depressors

INTENDED USE

Used in clinical oral consultations

MATERIAL

Manufactured using polystyrene

FEATURES

- More hygienic and pleasant to use than wooden depressors
- Ergonomically shaped for a more accurate view
- Sterile depressors are individually wrapped in a packet, while non-sterile depressors are supplied in economical bags
- CE marked

Product Code	Sterility	Inner pack quantity	Pieces per box
ITD-100	Non-Sterile	100	4800
ITD-101	ETO	50	2400

Cervix Spatulas

INTENDED USE

Used on exam tables in clinical consultations

MATERIAL

Manufactured using polystyrene

FEATURES

- More hygienic and pleasant to use than wooden spatulas
- Ergonomically shaped for a more accurate consultation
- Sterile spatulas are individually wrapped in a packet, while non-sterile spatulas are supplied in economical bags

Product Code	Sterility	Inner pack quantity	Pieces per box
ICS-100	Non-Sterile	100	5000
ICS-101	ETO	75	3600

05 | VARIOUS MEDICAL SUPPLIES

Male Urinals

INTENDED USE

Used to help urination for health care patients who have difficulty getting out of bed

MATERIAL

Manufactured using high-density polyethylene

FEATURES

- Has an opening for male genital insertion, long and narrow enough to prevent leakage while urination
- High practicality and simple to use
- Graduated both in mL and oz for easy determination of the urine amount produced

Product Code	Pieces per box
IUM-50	50

Female Urinals

INTENDED USE

Used to help urination for health care patients who have difficulty getting out of bed

MATERIAL

Manufactured using polypropylene

FEATURES

- Has a wide opening enough to prevent leakage while urination
- High practicality and simple to use
- Graduated both in mL and oz for easy determination of the urine amount produced

Product Code	Pieces per box
IUF-50	50

CANNULAS

IV Cannulas	16FG
IV Cannulas	18FG
IV Cannulas	20FG
IV Cannulas	22FG
IV Cannulas	24FG

05 | CANNULAS

IV Cannulas | 16 FG

INTENDED USE

Used to obtain venous access for IV fluid and medication administration

FEATURES

- ETO Sterilized
- Non-toxic and non-pyrogenic
- The flash back chamber allows a visual image of the blood flow
- Triple point needle for easy and painless skin perforation
- Wings designed for an easy grasp
- Needle is covered in order to prevent any damage
- Has a luer lock plug
- Features an injection port
- Made for single use
- Color-coded in accordance to international standards
- CE marked

Product Code	Size (FG)	Color	Inner pack quantity	Pieces per box
IIV-016	16	Grey	50	2000

IV Cannulas | 18 FG

INTENDED USE

Used to obtain venous access for IV fluid and medication administration

FEATURES

- ETO Sterilized
- Non-toxic and non-pyrogenic
- The flash back chamber allows a visual image of the blood flow
- Triple point needle for easy and painless skin perforation
- Wings designed for an easy grasp
- Needle is covered in order to prevent any damage
- Has a luer lock plug
- Features an injection port
- Made for single use
- Color-coded in accordance to international standards
- CE marked

Product Code	Size (FG)	Color	Inner pack quantity	Pieces per box
IIV-018	18	Green	50	2000

05 | CANNULAS

IV Cannulas | 20 FG

INTENDED USE

Used to obtain venous access for IV fluid and medication administration

FEATURES

- ETO Sterilized
- Non-toxic and non-pyrogenic
- The flash back chamber allows a visual image of the blood flow
- Triple point needle for easy and painless skin perforation
- Wings designed for an easy grasp
- Needle is covered in order to prevent any damage
- Has a luer lock plug
- Features an injection port
- Made for single use
- Color-coded in accordance to international standards
- CE marked

Product Code	Size (FG)	Color	Inner pack quantity	Pieces per box
IIV-020	20	Pink	50	2000

IV Cannulas | 22 FG

INTENDED USE

Used to obtain venous access for IV fluid and medication administration

FEATURES

- ETO Sterilized
- Non-toxic and non-pyrogenic
- The flash back chamber allows a visual image of the blood flow
- Triple point needle for easy and painless skin perforation
- Wings designed for an easy grasp
- Needle is covered in order to prevent any damage
- Has a luer lock plug
- Features an injection port
- Made for single use
- Color-coded in accordance to international standards
- CE marked

Product Code	Size (FG)	Color	Inner pack quantity	Pieces per box
IIV-022	22	Blue	50	2000

05 | CANNULAS

IV Cannulas | 24 FG

INTENDED USE

Used to obtain venous access for IV fluid and medication administration

FEATURES

- ETO Sterilized
- Non-toxic and non-pyrogenic
- The flash back chamber allows a visual image of the blood flow
- Triple point needle for easy and painless skin perforation
- Wings designed for an easy grasp
- Needle is covered in order to prevent any damage
- Has a luer lock plug
- Features an injection port
- Made for single use

CATHETERS

Suction Catheters

2 way Foley Balloon Catheters

3 way Foley Balloon Catheters

Nelaton Catheters

Suction Catheters

INTENDED USE

Used for the removal of secretions from the trachea and bronchial tube, clearing the patient's airway thus helping him breathe properly

MATERIAL

Manufactured using medical grade PVC tubes

FEATURES

- ETO sterilized
- Supplied with color coded funnel-shaped connector for easy identification of the size
- Individually packed in a flat sterile pouch
- Can be supplied with X-ray detectable material
- CE marked

Product Code	Size (FG)	Color	Inner pack quantity	Pieces per box

05 | CATHETERS

2 Way Foley Balloon Catheters

INTENDED USE

Used for either short or long term urine drainage

MATERIAL

Manufactured using natural latex rubber

FEATURES

- ETO sterilized
- Supplied with color coded balloon ring
- Individually packed in flat sterilization pouches
- Smooth round shaft, minimizing trauma during insertion and withdrawal
- Soft and consistently inflated balloon makes the tube sit well on the bladder

Product Code	Size (FG)	Color	Inner pack quantity	Pieces per box
IFC-206	6	Dark teal	100	2000
IFC-208	8	Blue	100	2000

IFC-226	26	Pink	100	2000

3 Way Foley Balloon Catheters

INTENDED USE

Used for removing blood clots from the urinary bladder after prostate gland surgery, as well as the treatment and management of simple hematuria following disease or trauma

MATERIAL

Manufactured using natural latex rubber

FEATURES

- ETO sterilized
- Supplied with color-coded balloon ring
- Individually packed in flat sterilization pouches
- Soft and consistently inflated balloon makes the tube sit well on the bladder

Product Code	Size (FG)	Balloon Capacity (cc)	Color	Inner pack quantity	Pieces per box

Nelaton Catheters

INTENDED USE

Used for short-term urine drainage

MATERIAL

Manufactured using non-toxic, non-irritant, medical grade PVC

FEATURES

- ETO sterilized
- Supplied with color-coded funnel-shaped connector for easy identification of the size and safe connection to the urine bag
- Individually packed in a flat sterile pouch
- CE marked
