

### SIMPLICITY, PERFORMANCE AND SAFETY

The RadioLogiX Radiographic System offers performance, quality and durability at an exceptional price. The compact design is perfect for small rad rooms. The system combines hospital-grade components, DR features, a selection of durable elevating or fixed height radiographic tables into a pragmatic solution for a complete modern radiographic suite. An integrated, easy to use, state of the art acquisition system, with wide selection of High-Resolution digital receptors, provides superior image quality for quick diagnoses.

A convenient, easily accessible fingertip control with digital display supports trouble free beam positioning. An anatomically programmed (APR), ultra-high frequency generator supports low-dose exposures and makes parameter set-up and preparation quick and easy. Optional Automatic Exposure Control (AEC) ensures optimum patient dose while providing excellent image quality.
